

SMART METAL SAFE GRAFFITI REMOVER

Metal Safe Graffiti Remover is a strong, fast acting, biodegradable liquid graffiti remover for exterior and interior surfaces. Metal Safe Graffiti Remover safely penetrates and loosens the graffiti on metal surfaces and makes it easy to remove.

Metal Safe Graffiti Remover can be used to remove graffiti on many different metal surfaces. Those surfaces include; pre-finished metal and powder coated products such as over head doors, colour bonded fencing, mail boxes, signal boxes, traffic signs, painted metal surfaces, and any other metal surfaces.

(Note: Metal Safe Graffiti Remover is NOT recommended for rubber and plastic surfaces.)

(Note: Metal Safe Graffiti Remover may be too harsh and printers ink could dissolve. Sign Safe Graffiti Remover, Marker Graffiti Remover, and General Purpose Graffiti Remover may be more appropriate products to use on metal signage.)

Exterior and Interior Graffiti Removal Process:

SAFETY INSTRUCTIONS

When starting a graffiti removal job always wear safety protection before handling any of the graffiti removing products. Safety goggles and chemical resistant gloves are required before using Metal Safe Graffiti Remover. Wearing long sleeves and long pants are recommended to protect the skin. Always have access to water when working with Metal Safe Graffiti Remover. If Metal Safe Graffiti Remover does get on your skin, wash the skin with water to remove the product.

Before using Metal Safe Graffiti Remover check the surface to see how clean it is. The surface does not have to be perfectly clean to start, but if the surface has substantial dirt on it, the dirt may impede the penetration process and should be washed off before removing the graffiti.

(Note: Always test product on a small hidden area prior to full application.)

Equipment Needed for Removal of Graffiti:

1. Metal Safe Graffiti Remover
2. Safety equipment (goggles, chemical resistant gloves, etc.)
3. Bucket of water
4. Rags
5. Sponge, Sprayer or scouring pad

Application Method:

1. Put your chemical resistant gloves and goggles on
2. Wash down the surface with water using a rag
3. Shake the product to activate it
4. Pour needed amount of product on another rag, sponge, or scourer pad
5. Dab the product liberally on the graffiti
6. Let the product activate on the surface for 60 seconds
7. Agitate surface with a rag, sponge, or scouring pad
8. Wash off with water using a new rag
9. Repeat steps if graffiti is still showing

* Can also be applied with a chemical resistant sprayer

At the end of the job, wash down all safety equipment and tools used in the removal process to get all of the Metal Safe Graffiti Remover off for reuse on the next job.

Results and Benefits:

The main differences between Metal Safe Graffiti Remover and other graffiti removal methods include: dramatically reducing the time it takes to remove the graffiti, one application effectiveness in removing 99% of the typical graffiti and no damage to the original underlying surface! Metal Safe Graffiti Remover gets all of the graffiti off the surface within minutes while other products can take multiple applications and hours of time. Metal Safe Graffiti Remover enables removal in minutes on all the typical metal surfaces which saves our customers significant time and labour. With less time and labour spent on each individual graffiti removal job, our customers can get 2, 3 even 4 times as many graffiti removal jobs accomplished per shift. Plus, you will not be spending labour or buying paint to paint over the graffiti on signal boxes anymore, nor repairing or repainting surface damage from inappropriate graffiti removal products.
